Management

Systems

Keep it positive!

Encourage your students
to manage themselves
with Talk Light.

Talk Light™

Talk Light™

TALK LIGHT™

Noise Management:

The full sized traffic light was designed for use in large facilities such as a cafeteria, auditorium, production facility or any other large room where noise level is a concern. The microphone that is installed in the light is adjustable to provide the level of sensitivity required any environment. The optional Remote Control allows the capability to override the noise management portion of the light and control all four colors with a hand held remote.

Speciality Applications:

The Talk Light can be used for virtually any application that requires an audible and visual alert. The lights can be pre-programmed based on requirements or designed to integrate with user provided controls.

Technical Information:

- Standard Traffic Light is 36" tall, 10" wide & 14" deep
- Approximately 18lbs
- Uses Fan duty 40 watt standard, screw-in, medium base light bulbs. Available at all hardware stores
- Standard Power outlet, 10' power cord provided

Customized Programming:

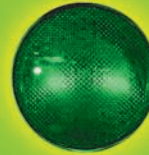

The computer circuit inside the traffic light is very flexible and can be programmed for virtually any application. Please contact us to discuss your specific application.

HOW IT WORKS

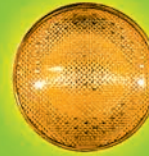

Green Light:

On during normal noise levels

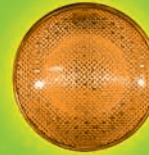

Yellow Light:

On during moderate noise levels

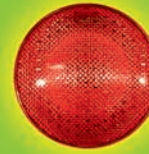

Yellow Flashing Light:

This light provides a one minute warning when the noise level has exceeded an acceptable level

Red Light:

This light is on during unacceptable talk levels. The red light stays on from one to nine minutes. There is also an audible alert when the light goes to red. This feature can be turned on or off and the volume of the alert can be adjusted. Talk Light too is preset for the red light to stay on one minute

Remote Control:

Provides remote control access to the traffic light to manually change the colors from green, yellow, flashing yellow and red

TALK LIGHT TOO™

Noise Management:

This small traffic light is designed to monitor the noise level in smaller areas such as classrooms, office, hospitals, libraries or other common areas where noise level is a concern. The Talk Light too has a built in stand or can be mounted to a wall.

Time Management:

The manual or programmable Time Manager is designed to time events such as presentations, debates, circuit training, tournaments or any other time sensitive applications. There is also an optional remote control that can be used to change the colors of the light.

Technical Information:

- 18" tall and is made out of durable metal
- Uses Automotive light bulbs which are easy to replace
- Standard Power outlet, 6' power cord provided
